INTRODUCTION

The internship is one of the most important experiences in the student’s preparation as a clinical counselor. The internship experience follows practicum and provides further opportunity for students to assume the role of professional counselor-in-training (counselor trainee) and to provide clinical services within a community agency, school, or private group practice under appropriate supervision. In the internship, students have the opportunity to synthesize and apply what they have learned in theory, practice, and research in an actual counseling setting. While in this setting, the site supervisor serves as an important role model and mentor, guiding the intern as she/he works with clients. Thus the internship is intended to be an experience from which the student, clients, the internship site, and the school can all benefit.

It is important that each student chooses an internship setting that is as close as possible to the one in which the student will eventually seek employment. Consideration should be given to selecting an internship site that offers opportunities for the student to engage in both individual and group counseling. The internship experience must provide the student with opportunities to engage in clinical counseling services; that is, the student must engage in the diagnosis and treatment of mental disorders. Additional clinical services include, but are not limited to, gaining experience in conducting assessments, determining DSM-IV diagnoses, providing appropriate treatment interventions to clients, and constructing individualized treatment plans, all provided under appropriate supervision. The clinical nature of the internship experience fulfills state licensure eligibility requirements.

Your participation in this counseling internship requires a commitment of time and effort. The expertise of the site supervisor, and his/her willingness to participate, should be valued and appreciated. Throughout the internship, I welcome feedback and would be happy to discuss any questions and/or concerns you or your site supervisor may have.

This handbook will acquaint you with information regarding the internship. Remember that these only serve as guidelines and you should work closely with Dr. Lee Wetherbee, LPCC-S, the Midwest Internship Coordinator, to assure that you meet all the requirements necessary for completion of your degree.
INTERNSHIP PLACEMENT

Consideration should be given to selecting an internship site that offers opportunities for a student to engage in both individual and group counseling. Internship provides an opportunity for the student to perform, under supervision, a variety of activities that a regularly employed staff member would be expected to perform in that particular setting. A regularly employed staff member is defined as a person occupying the professional role to which the student is aspiring.

TIME REQUIREMENTS

The State of Ohio Counselor, Social Worker, and Marriage & Family Therapist Board requires counseling students to complete a supervised internship of 600 clock hours that is begun after successful completion of the student’s practicum. The supervisor must be a professional clinical counselor or professional counselor who has supervising counselor status (4757-13-01, Section A.1.d.iv). The 600 hour internship includes:

3. the opportunity for the student to become familiar with a variety of professional activities other than direct service;

4. the opportunity for the student to audiotape and/or videotape the student’s interactions with clients for use in supervision (only with written consent by the client[s]);

5. the opportunity for the student to gain supervised experience in the use of a variety of professional resources, including print and non-print media, professional literature, research, and information and referral to appropriate providers; and
